## **ELVeS Radial™ therapy for varicose veins excites international experts at 10<sup>th</sup> Master Course of Phlebology in Riga – President-Elect of UIP present**

**ELVeS Radial™ laser therapy enthuses international audience of experts at 10<sup>th</sup> Master Course of Phlebology under lead of Dr. Uldis Maurins – safety and quality standard of biolitec® ELVeS Radial™ therapy – simple and minimally invasive**

Jena, February 02, 2015 – For the 10<sup>th</sup> time the International Master Course of Phlebology was held in December 2014, and hosted by Dr. Uldis Maurins, President of the Baltic Society of Phlebology and director of Dr. Maurins Vein Clinic in Riga. Among the guests were international authorities of Phlebology such as Dr. Nick Morrison, President-Elect of the International Union of Phlebology (UIP), and his colleague and Vice President of UIP, Dr. Attilio Cavezzi, both representatives of the international organization UIP whose goal is to advance excellence and innovation in the field of Phlebology and to advance the teaching of phlebologists.

The Master Course 2014 was again all about the latest and most innovative methods of varicose vein treatment. Here biolitec®'s ELVeS Radial 2ring™ therapy again proved itself as the ultimate solution. As a minimally-invasive and almost painless treatment option, which is also characterized by its high quality standards, ELVeS Radial 2ring™ was met with great approval among the international audience.

To his Master Course of Phlebology, Dr. Maurins welcomed around 70 guests from all over the world to participate in the workshop and become acquainted with the ELVeS Radial 2ring™ therapy by biolitec®.

While day one and the morning hours of day two offered theory blocks, the afternoon of day two gave the participants the opportunity to experience different treatments live, which were conducted by Dr. Maurins himself, as well as by Dr. Morrison, Dr. Cavezzi, and some other colleagues. Within four hours, around 36 patients were successfully treated with the minimally-invasive ELVeS Radial 2ring™ therapy and the highly efficient LEONARDO® laser.

During the treatment ELVeS Radial 2ring™ fibers are used to make a minimally-invasive treatment possible. Having given local anesthesia respectively tumescent anesthesia, which allows for an almost painless treatment, the light-conducting ELVeS Radial 2ring™ fiber is

introduced into the vein through a small incision, where it then seals the varicose vein from the inside with its 2-phase radiation.

Especially the high quality standards of all biolitec products make them extremely successful on national and international levels, and lead to an increased demand. The unique FUSION™ technology by biolitec®, where the silica glass caps are fused to the fiber and not only glued, guarantees a high level of safety during any procedure.

Depending on which country you live in, the costs may be covered by your health insurance. Please consult your physician.

## **About biolitec:**

biolitec AG is one of the leading companies worldwide in the field of medical laser treatments and the only provider that possesses all relevant core competencies – photosensitizers, laser devices and optical fibers – in the field of photodynamic therapy (PDT). Besides laser-based treatment of cancer with the drug Foscan®, biolitec AG primarily researches on minimally-invasive and gentle laser treatments and markets them. ELVeS Radial™ (Endo Laser Vein System) is the most often used laser system worldwide for the treatment of varicose veins. In combination with the Ceralas® HPD laser, the innovative contact fiber XCAVATOR™ enables a gentle treatment of e.g. benign prostatic hyperplasia (BPH) in urology. The new LEONARDO® diode laser by biolitec® is the first universally applicable medical laser which features a combination of two wavelengths, 980nm and 1470nm, and is suitable for interdisciplinary use. Gentle laser treatments in the fields of proctology, ENT, gynecology, thoracic surgery as well as pneumology also belong to the business field of biolitec AG. Further information at [www.biolitec.com](http://www.biolitec.com).
